DETAILED ACTION

Information Disclosure Statement

The information disclosure statements (IDS) filed 4/23/2008 and 5/5/2006 are being considered by the examiner.

The information disclosure statement filed 5/5/2006 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. In particular, the International Search Report of 9/7/2004 has not been submitted.

Drawings

The drawings are objected to because extraneous leader lines should be removed.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 9 and 15.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of

Art Unit: 3679

any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 486000 A1.

In regards to claims 1-20, in Figure 1, EP 486000 A1 discloses a holding device for a shower hose, comprising: a feed-through element, a shower hose led through the feed-through element, a retaining mechanism for securing the shower hose against a movement in at least one direction, and a detachable coupling for coupling and decoupling the hose with the retaining mechanism.
